

SRIRAM R

Full Stack Developer (Node.js | Angular | PostgreSQL)

Chennai, India | +91-9344991998 | sriramrajendran.p@gmail.com | www.linkedin.com/in/rsriram25062

Summary

Full Stack Developer with **2.5+ years of expertise** in building scalable web applications using **Node.js, Express.js, Angular and PostgreSQL**. Skilled in RESTful API development, database optimization, authentication systems, and responsive UI development. Experienced in Agile Scrum environments, production support, debugging and performance optimization.

Skills

- **Backend:** Node.js, Express.js, REST API Development, JWT Authentication, Middleware Integration
- **Frontend:** Angular, React, HTML, CSS, TypeScript, JavaScript, Responsive Web Design
- **Database:** PostgreSQL (SQL Queries, Database Optimization, Joins & Indexing), MongoDB
- **Tools & Technologies:** Git, GitHub, Visual Studio Code, Postman, Node Cron, API Integration
- **Core Competencies:** Full Stack Web Development, CRUD Operations, Authentication & Authorization, Debugging & Production Support, Performance Optimization, Agile Scrum Methodology, Unit Testing

Work Experience

ITECHBEES DIGITAL SOLUTIONS – Hyderabad, India

Software Engineer – Development

Jul 2023 – Present

- Designed and developed **full stack web applications** using **Angular, Node.js, Express.js, and PostgreSQL**, including responsive user-friendly frontend interfaces using **Angular, HTML, CSS, and TypeScript**.
- Built secure and scalable **RESTful APIs** with **JWT authentication, middleware integration, and request validation**.
- **Optimized PostgreSQL queries and database schemas**, improving API performance and response time.
- **Integrated a third-party service** and implemented automated background jobs using **Node Cron** for **scheduled task execution**.
- Performed **debugging, code reviews, and unit testing** to ensure application quality, stability, and maintainability.
- Collaborated with cross-functional **Scrum teams** during sprint planning, task estimation, and retrospectives.
- Resolved production issues and ensured smooth application deployments, releases, and system stability.
- Maintained source code using Git and GitHub for version control and collaborative development.
- Mentored junior developers and contributed to knowledge sharing within the development team.

Education

- **Bachelor of Engineering (B.E)** – CGPA: 8.15/10
SRM Valliammai Engineering College, Chennai | Jul 2019 – May 2023

Projects

Integrated Purchase Order & Shipment Management System | Full Stack Developer

Technologies: Angular, TypeScript, Node.js, Express.js, PostgreSQL, REST APIs, JavaScript

Description: Developed a comprehensive web-based platform to streamline purchase order management, shipment bookings, and carrier service integrations. **The application handled the complete order fulfillment lifecycle from purchase order creation to shipment booking and tracking.**

Modules Worked On:

- **Purchase Order Injection:** Allows users to create, update, and track purchase orders. Developed a system which includes automated injection of orders based on schedule along with validation of file and data to reduce the manual process by 80%.
- **Shipment Booking:** Facilitates the booking of shipments with various carriers. Users can select carriers based on criteria such as cost, delivery time, and service type.
- **Carrier Services Integration:** Supports integration with multiple carrier services (e.g., FedEx, UPS, DHL) to provide users with a comprehensive range of shipping options.

Key Contributions:

- **Responsibilities:** Designed and implemented the front-end using Angular, ensuring a responsive and user-friendly interface. Developed REST APIs with Express.js and Node.js to handle data transactions and business logic.
- **App improvements:** Optimized database queries in PostgreSQL, resulting in a 40% reduction in response time for user searches.
- **Collaboration:** Worked closely with a team of 8 developers, 1 designer, and 1 project manager to deliver the project on time and daily Scrum meetings to discuss application improvements and business requirements. Conducted code reviews and provided mentorship to junior developers.

Healthcare Claims & Billing Management System | Full Stack Developer

Technologies: Angular, TypeScript, Node.js, Express.js, PostgreSQL, REST APIs, JavaScript

Description: Developed a web-based healthcare management application to streamline medical billing, insurance claims processing, and patient management workflows. **The system helped improve claims handling efficiency, secure patient data management, and billing operations.**

Modules Worked On:

- **Insurance Claims Processing:** Developed modules for claim creation, validation, approval workflows, and status tracking to improve claim processing efficiency.
- **Medical Billing Management:** Implemented billing workflows for patient invoices, healthcare service records, and billing data management.
- **Patient Management:** Built functionalities for managing patient records, appointment details, and treatment-related information.

Key Contributions:

- **Responsibilities:** Designed and implemented responsive front-end modules using Angular with reactive forms, validation, and dashboard functionalities. Developed secure REST APIs using Node.js to handle claims processing, billing operations, and patient data management.
- **App Improvements:** Improved application performance and claims handling workflows by optimizing data processing and validation logic, helping reduce processing delays and improve overall system efficiency.
