Summary

Full Stack Developer with **3 years of experience (2Y 10M)** building production-grade web applications — from database schema to responsive UI. Proficient in **Node.js, Express.js, Angular, and PostgreSQL**. Skilled in RESTful API design, JWT authentication, SQL optimization, and Node Cron automation. Experienced in Agile Scrum environments, **Git-based workflows, and cross-functional team** collaboration.

Skills

Backend: Node.js, Express.js, REST API Development, JWT Authentication, Middleware Integration, Node Cron

Frontend: Angular, React, TypeScript, JavaScript, HTML5, CSS3, Responsive Web Design

Database: PostgreSQL (SQL Queries, Database Optimization, Joins & Indexing), MongoDB

Tools & Technologies: Git, GitHub, Visual Studio Code, Postman, API Integration

Core Competencies: Full Stack Web Development, CRUD Operations, Authentication & Authorization, Debugging, Performance Optimization, Agile Scrum Methodology, Unit Testing

Exposure: Docker (Local Containerization), AWS EC2 / S3 (Basic Deployment)

Work Experience

ITECHBEES DIGITAL SOLUTIONS – Hyderabad, India

Software Engineer – Development

Jul 2023 – Present

- Architected and delivered **full stack web applications** across **complex enterprise domains** using **Angular, Node.js, Express.js, and PostgreSQL** — following **MVC architecture**.
- Engineered **JWT-authenticated RESTful APIs** with layered **middleware validation**.
- Optimized **PostgreSQL schemas, joins, and indexing strategies** — improving **API response time by 40%** across high-traffic modules.
- **Automated purchase order workflows** via **Node Cron** — eliminating **80% of manual processing effort**.
- Built **reusable Angular component** libraries with **reactive forms and responsive layouts**.
- Performed **debugging, code reviews, and unit testing** to ensure app **quality, stability, and maintainability**.
- Collaborated with **cross-functional Scrum teams** during **sprint planning, task estimation, and retrospectives**.
- **Mentored junior developers** and contributed to **knowledge transfer** within the development team.

Education

Bachelor of Engineering (B.E.) – CGPA: 8.15/10

SRM Valliammai Engineering College, Chennai | Jul 2019 – May 2023

Projects

Integrated Purchase Order & Shipment Management System | Full Stack Developer

Technologies: Angular, TypeScript, Node.js, Express.js, PostgreSQL, REST APIs, JavaScript

Description: Developed a web-based platform to streamline purchase order management, shipment bookings, and carrier booking. **The application handled the complete order fulfillment lifecycle from purchase order creation to shipment booking and tracking.**

Modules Worked On:

- **Purchase Order Injection:** Allows users to create, update, and track purchase orders. Developed a system which includes automated injection of orders based on schedule along with validation of file and data to reduce the manual process by 80%.
- **Shipment Booking:** Facilitates the booking of shipments with various carriers. Users can select carriers based on criteria such as cost, delivery time, and service type.
- **Carrier Booking:** Developed a carrier management module enabling multiple carrier services (e.g., FedEx, UPS, DHL) to onboard and manage shipment bookings.

Key Contributions:

- **Responsibilities:** Designed and implemented the front-end using Angular, ensuring a responsive and user-friendly interface. Developed REST APIs with Express.js and Node.js to handle data transactions and business logic.
- **App improvements:** Optimized database queries in PostgreSQL, resulting in a 40% reduction in response time for user searches.
- **Collaboration:** Worked closely with a team of 8 developers, 1 designer, and 1 project manager to deliver the project on time and daily Scrum meetings to discuss application improvements and business requirements. Conducted code reviews and provided mentorship to junior developers.

Healthcare Claims & Billing Management System | Full Stack Developer

Technologies: Angular, TypeScript, Node.js, Express.js, PostgreSQL, REST APIs, JavaScript

Description: Developed a web-based healthcare management application to streamline medical billing, insurance claims processing, and patient management workflows. **The system helped improve claims handling efficiency, secure patient data management, and billing operations.**

Modules Worked On:

- **Insurance Claims Processing:** Developed modules for claim creation, validation, approval workflows, and status tracking to improve claim processing efficiency.
- **Medical Billing Management:** Implemented billing workflows for patient invoices, healthcare service records, and billing data management.
- **Patient Management:** Built functionalities for managing patient records, appointment details, and treatment-related information.

Key Contributions:

- **Responsibilities:** Designed and implemented responsive front-end modules using Angular with reactive forms, validation, and dashboard functionalities. Developed secure REST APIs using Node.js to handle claims processing, billing operations, and patient data management.
- **App Improvements:** Improved application performance and claims handling workflows by optimizing data processing and validation logic, helping reduce processing delays and improve overall system efficiency.
